TZAMR-SL600 SLAM AMR

The AMR uses SLAM navigation to move forward, backward, and rotate in place. It can go to the bottom of trolly to lift and move the trolly. The AMR has compact structure, which can work in limited spaces. The product has a high degree of flexibility and scalability, and can be customized to the user's needs for customized configuration and function customization, which is suitable for applications in different scenarios, such as industrial automation, logistics and warehousing, hospital pick-up and drop-off, and so on.

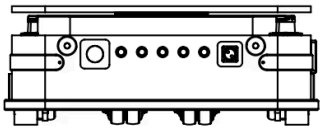

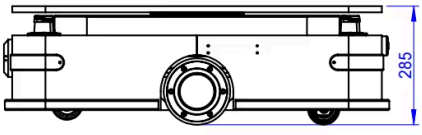

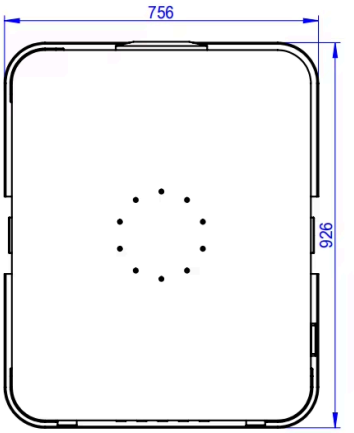

Product Information

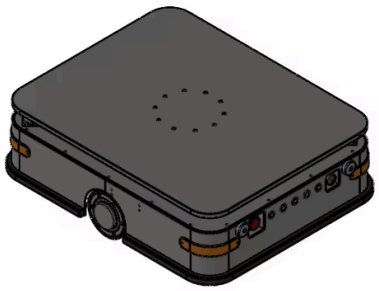

Item	Parameters
Dimensions	L926*W756*H285mm
Navigation	SLAM
Lifting Height	60mm
Drive Type	Differential drive
Walking Direction	Forward and reverse/left and right tur/ rotate in place
Maximum Speed	1.5m/s
Rated Load	600kg
Battery	Lithium iron phosphate battery
Charging Method	Manual/automatic charging
Safety Protection	LIDAR+Collision Bumper+Emergency Stop Button
Communication	Wireless

Dimensions

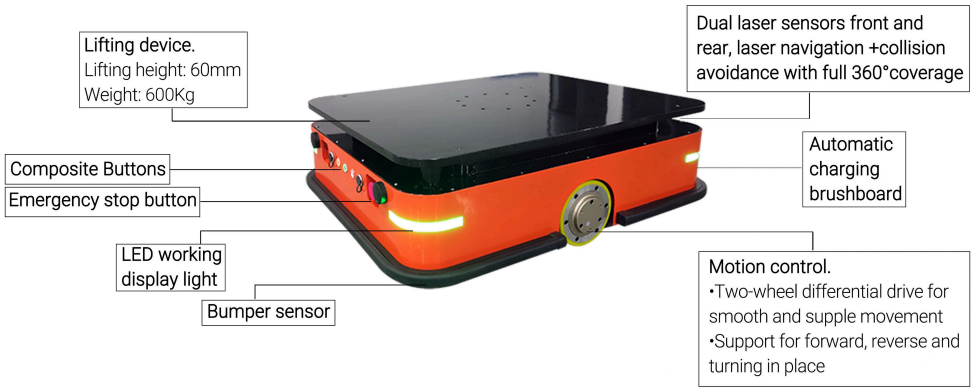

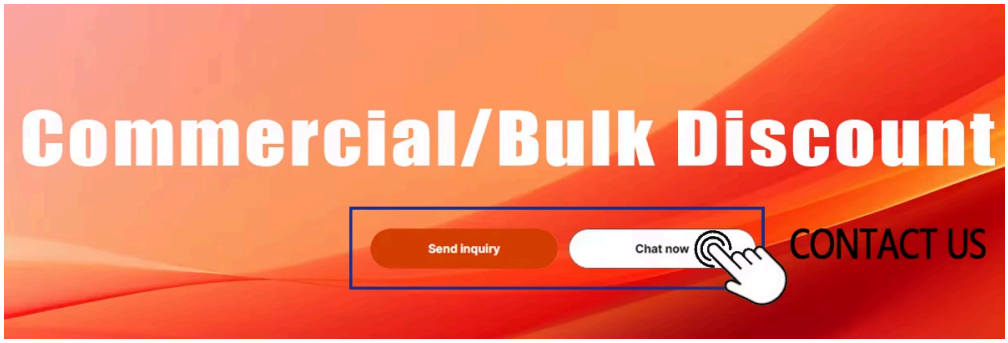

Function

Advantages

Safety Protection

Laser anti-collision (360 degrees)
+ mechanical anti-collision
+ emergency stop button

600KG Load Capactiy

Load capacity of 600 kg for carrying loads in variety of scenarios , including material transfer , call delivery, and other productions .

Lifting function

The laser-guided amr is an autonomous mobile robot with a lifting function that makes it easier to lift and move shelves.

Product Details

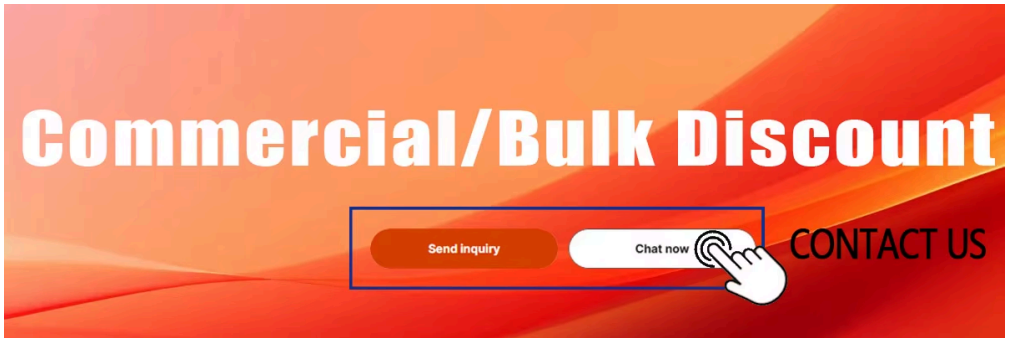

No.	Function Item	Function description	No.	Function Item	Function Item
1	Two modes of operation	Auto/manual mode	10	Emergency stop	Emergency stop button
2	Linear deceleration stop	Slow down at stops or when obstacles are encountered	11	Laser Collision Avoidance	First protection
3	Start linear acceleration	Start from slow to fast	12	Mechanical collision avoidance	Second protection
4	Select station stop	Automatic stop at destination	13	Emergency braking	Third protection
5	Off-track alarm	Audible and visual alarms	14	Photoelectric collision avoidance	Fork anti-collision
6	Anti-collision alarm	Audible and visual alarms	15	One-touch start	Easy and quick start
7	Low voltage alarm	Audible and visual alarms	16	Woving music	Alerts pedestrians
8	Low voltage alarm	Audible sound, indicator light	17	Charging method	Auto/manual charging
9	Traffic control	Crossroads traffic control	18	Software tool	Complete with extensive software tools

Company introduction

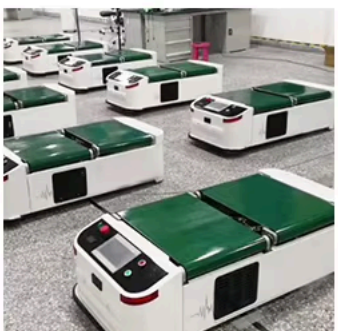

Zhejiang Tongzhu Technology Co., Ltd founded 2015, in ZHEJIANG designs, manufactures and sells agv, driving wheel assembly, DC/AC motors, encoder, reducer, controller, caster wheel, gear, Pu wheel, motor in wheel units and all over the world.
TZBOT continues to bring excellent products, technological innovation and ease of customizing to the automated equipment.
The core to TZBOT's growth is the constant dedication to the pursuit of full customer satisfaction. They have a strong presence in domestic and international markets, as well as, great production flexibility.
TZBOT has come to be recognized as one of the biggest suppliers of electric drive.
Continued investment in the most modern machinery has further increased and developed the quality and flexibility of each product.
Today, TZBOT can quickly design and produce engines and special parts request from customers.
TZBOT's product are used in a myriad of application, including but not limited to: Forklifts, AGV, Aerial Platforms, Airport Machines, Agricultural Machines, Hydraulic Applications, Floor Scrubbers, Sweepers, Wind Energy, Marine, and in the field of Medical Devices.
All prototypes are tested for extended periods of time to verify the quality and the duration will work perfectly before sending production parts to customers. Due diligence is paramount to the satisfaction of our customers.
